About Us

In a world that is rapidly evolving toward cleaner and smarter energy solutions, Ghazi Gas Marketing & Distribution (Private) Limited stands at the forefront of innovation in the natural and flare gas sector.

Established on April 25, 2020, and registered with the Securities & Exchange Commission of Pakistan (SECP), Ghazi Gas is a private limited company formed with the core objective of marketing and distributing Natural Gas and Flare Gas to industrial, commercial, and other end-users across Pakistan.

Ghazi Gas provides a cost-effective and efficient alternative to conventional pipeline gas through a virtual pipeline network. Utilizing state-of-the-art technology in low-pressure gas compression, safe road transportation, and decompression systems, the company ensures the reliable delivery of gas to various sectors. With its modern gas processing and storage infrastructure and a dependable CNG transport system, Ghazi Gas is committed to supplying energy to towns, industries, commercial establishments, and CNG stations with a focus on safety, efficiency, and sustainability.

Our Management

The leadership team at Ghazi Gas Marketing & Distribution (Private) Limited (GGMDPL) brings over a decade of hands-on experience in the production, marketing, and distribution of high-pressure fuels and Compressed Natural Gas (CNG). The company's strategic direction and operations are overseen by a seasoned and visionary Board of Directors, comprising:

- 1. Babar Aftab Qazi – Chief Executive Officer (CEO)**
- 2. Qasim Obaidullah Paracha – Executive Director**
- 3. Pervaiz Khan Khattak – Director**

Together, this leadership team combines entrepreneurial expertise, technical proficiency, and industry insight to drive Ghazi Gas toward its mission of providing innovative, sustainable, and efficient energy solutions.

Babar Aftab Qazi

Chief Executive Officer (CEO)

Mr. Babar Aftab Qazi is a dynamic entrepreneur from a well-established business family based in Islamabad. He holds a postgraduate degree from an international institution and brings a diverse professional background spanning production, marketing, advertising, retail, sales, and hospitality. With hands-on experience in the operation of CNG stations and fuel retail outlets, Mr. Qazi has developed specialized expertise in the handling and management of high-pressure fuels. Leveraging this experience, he founded Ghazi Gas Marketing & Distribution (Pvt.) Ltd. to address the growing demand for alternative energy solutions through the compression, transportation, and

distribution of Natural and Flare Gas from oil and gas fields to urban and industrial consumers. He currently serves as the Senior Vice Chairman and Executive Member of the All-Pakistan CNG Association (APCNGA). His leadership roles also include serving as an Executive and General Body Member of the Federation of Pakistan Chambers of Commerce & Industry (FPCCI) and being appointed to the Executive Body of the Islamabad Chamber of Commerce & Industry (ICCI).

Col. Qasim Obaidullah Paracha (Retd)

Executive Director

Mr. Col. Qasim Paracha (R) is a distinguished leader with over 35 years of professional experience, combining military, corporate, and strategic expertise. As Director of Universal Gas Distribution Company and Executive Director of Ghazi Gas Marketing and Distribution Company Limited, he leads innovative initiatives in gas marketing and distribution, driving sustainable growth in the energy sector.

During his illustrious military career, he served as a senior Army officer, including honorable assignments with the Drugs Enforcement Administration, demonstrating exceptional leadership and strategic planning capabilities in diverse and challenging environments. His service has been recognized with two prestigious Presidential Awards.

Masters in International Relations and Certified Director from the Pakistan Institute of Corporate Governance. He has done various management courses both locally and internationally transitioning seamlessly into the corporate sector, he has accumulated over four years of experience in the gas industry, where he has successfully led business development efforts, established strategic joint ventures, and delivered impactful solutions for Pakistan's leading industrial sectors. His dynamic career in defense, corporate governance, energy, and business development reflects his commitment to excellence and sustainable progress across industries.

Pervaiz Khan Khattak

Director Technical

Mr. Pervaiz Khan Khattak is a seasoned professional with over 24 years of experience in the CNG and fuel distribution sector. A graduate with a strong background in engineering technology, he is a prominent businessman and respected social figure in Khyber Pakhtunkhwa.

Mr. Khattak owns and operates multiple CNG stations, petrol pumps, and certified cylinder testing laboratories across Kohat, Nowshera, and Mardan. His technical knowledge and entrepreneurial spirit have earned him recognition as a country representative for leading Chinese and European firms, managing the sales and distribution of CNG-related machinery, equipment, kits, and cylinders.

In addition to his directorial role at Ghazi Gas, he also serves on the board of another Flare Gas sales and distribution company. He hails from an agricultural business family and is well known for his contributions to the citrus fruits and olive production industry.

Mr. Khattak has represented Pakistan in over 20 international business events and delegations, traveling extensively across North America, Europe, East Asia, and the Middle East. He held the position of Central Chairman of the All-Pakistan CNG Association (APCNGA) in 2014 and has been an executive member of both the Federation of Pakistan Chambers of Commerce & Industry (FPCCI) and the Sarhad Chamber of Commerce & Industry (SCCI). He also served as a member of the Asian Natural Gas Vehicles Association (ANGVA), contributing to international dialogue on clean energy.

Professional/Technical and Support Team

The company employs a highly qualified team comprising Engineers, Associate Engineers, Technicians, and Executive/Support Staff to manage the operation and maintenance of its processing facility, as well as to oversee strategic planning at the Head Office. This team is instrumental in executing current initiatives and in expanding the company's operations in alignment with its long-term vision. All regulated activities are conducted in strict adherence to the company's Health, Safety, and Environment (HSE) Policy, which has been meticulously developed to meet recognized industrial standards.

What We Do

The company is engaged in specialized technical services across the Compressed Natural Gas (CNG) and Flare Gas sectors, including:

- Design, installation, and commissioning of CNG refueling stations.
- Installation of high-pressure CNG equipment and associated mechanical systems for gas compression, storage, and dispensing.
- Deployment of **Mother CNG Stations** at gas field locations, incorporating high-capacity compression and storage systems.
- Setup of **Daughter CNG Stations**, including installation of pressure-reducing systems and cascade storage for off-grid gas supply.
- End-to-end management of Flare Gas/Natural Gas value chain—comprising gas procurement, compression, storage in mobile transport modules (trailers), logistics, distribution, and marketing.
- Operation of a Flare Gas Recovery and Processing Facility installed at the OGDCL Oil Field in Rajian, Chakwal, enabling gas transportation via specialized gas bowsers to industrial and commercial consumers.

- Development and installation of additional modular gas processing units under a **Virtual Pipeline** model for the supply of natural gas to off-grid end users.

Our Vision

To promote widespread access to energy and environmentally friendly alternative fuels, contributing to an improved quality of life and the overall economic growth of the country.

Our Mission

To continuously redefine energy and alternative fuel solutions by enabling the efficient and sustainable utilization of natural gas through the Virtual Pipeline System, ensuring reliable supply while serving the needs of society and protecting the environment.

Approvals & Regulatory Compliance

The company operates in full compliance with regulatory frameworks and has obtained the following key approvals, licenses, and no-objection certificates (NOCs) from relevant government authorities in Pakistan:

1. Natural Gas/Flare Gas Sales License

- Issued by the Oil & Gas Regulatory Authority (OGRA) for the sale of natural gas and flare gas from the Gazi Gas Processing Facility at the OGDCL Rajian Gas Field, District Chakwal, to designated consumers.
- Granted under the Natural Gas Regulatory Authority (Licensing) Rules, 2002 and in accordance with the Federal Government's Flare Gas Utilization Guidelines, 2016.

2. Gas Processing and Storage License (Form 'A')

- Issued by the Department of Explosives, Government of Pakistan under the Mineral and Industrial Gases Safety Rules, 2010, authorizing the processing and storage of gas.

3. Environmental Approval

- Granted by the Punjab Environmental Protection Agency (EPA) under the IEE/EIA Regulations, 2000 and the Punjab Environmental Protection Act, 1997, for the installation of compression and gas transportation facilities at Rajian Gas Field, District Chakwal.

4. No Objection Certificate (NOC)

- Issued by the District Authority Chakwal under the Mineral and Industrial Gases Safety Rules, 2010 for the installation of a Natural Gas Processing and Distribution Facility at Mogla Rajian, District Chakwal.

5. Certificate of Incorporation

- Issued by the Securities and Exchange Commission of Pakistan (SECP) under the Companies Act, 2017 (Act XIX of 2017), confirming the company's registration as a private limited entity.

Compliance with Approved Specifications and Technical Standards

The company strictly adheres to all relevant national and international specifications and technical standards for the procurement, sale, and transportation of Natural Gas and Flare Gas. These include:

- **Federal Government's Flare Gas Utilization Guidelines (2016)** — for the utilization, handling, and commercial sale of flare gas in accordance with national energy policy.
- **European Machinery Safety Standards** — applied to equipment design, auxiliary systems, instrumentation, and safety devices, in compliance with regulatory and legal safety frameworks approved by relevant authorities.
- **BS EN 50014:1998** — adopted for the specification and use of electrical apparatus in explosive atmospheres, ensuring safe operations in hazardous zones.
- **IEC 60364 (Low Voltage Electrical Installations)** — for ensuring the protection of personnel and property in all low-voltage electrical installations.
- **ISO 11120** — standard for the design, manufacture, and testing of gas cylinders used in the transportation of high-pressure gases, including compressed natural gas.
- **ISO 9809-1** — specification for seamless steel gas cylinders used for the storage of compressed natural gas (CNG).
- **ECE R110 (adopted by OGRA)** — European-approved standard governing the design, construction, and refueling safety of on-board CNG cylinders and components.

Contracts and MOUs with Gas Producers, Transporters, and Consumers

The company has established formal agreements and strategic partnerships for the procurement, transportation, and sale of Natural Gas/Flare Gas. Key contracts and memorandums of understanding (MOUs) currently in effect include:

- Gas Sales and Purchase Agreement (GSPA) with Oil & Gas Development Company Limited (OGDCL) for the procurement of Natural Gas/Flare Gas from the Rajian Gas Field, District Chakwal.
- Gas Supply Contract with M/s Kohinoor Textile Mills Limited, for delivery to its facilities in Rawalpindi and Gujar Khan.

- Gas Supply Contract with Murree Brewery Company Limited, Rawalpindi.
- Memorandum of Understanding (MOU) with Shaheen Energy (Pvt.) Limited, Karachi, for the transportation of gas from the company's Rajian Processing Facility to designated consumer sites. This covers the full daily volume of gas procured from OGDCL's Rajian Oil & Gas Field.
